

NASF 1000

February 2017

Dear NASF Member:

Over five years ago we launched an effort among the top leaders in the plating industry to raise \$500,000 to rebuild our GAC Fund to support the industry's advocacy and government relation's activities. As of this letter, 140 organizations and individuals have joined the NASF 1000, and today we need your support more then ever to reach our new goal of 200 donors.

We want to ensure that we can face the next challenge (such as EPA efforts to revise the industry's wastewater discharge limits or new chemical management regulations, including those targeting nickel compounds) without being limited by the lack of funds to hire the technical, economic and legal expertise needed to mount a successful challenge to regulatory and statutory actions that threaten the surface finishing industry.

The NASF 1000 is a select group of leaders making a \$1,000 or more annual contribution towards our goal of \$500,000. To those leaders who have contributed, we thank you and look forward to your continued support. For the other leaders in the industry, we ask that you make a commitment today and join the NASF 1000.

The NASF 1000 contributors are again recognized at NASF events for their support. Your investment in the GAC Fund will demonstrate to the membership the seriousness of our efforts, and continue the momentum for our grassroots fundraising campaign.

Thank you for considering this important opportunity to sustain our government relation's efforts for the next decade. These funds will be restricted for this use only and we are committed to achieving our goals. A list of the current NASF 1000 members is attached with a pledge form for your investment in our future.

You can access this information on the NASF website at NASF.org/1000. If you have any questions or would like additional information, please contact Jeff Hannapel at 202-257-3756 or jhannapel@thepolicygroup.com.

Best regards,

Paul Brancato
NASF President

Rick Delawder
GAC Chair
